Manuel ABENDROTH, Jérôme DECOCK, Els VERMANG - live and work in Brussels, Belgium

yes:no, perhaps

LAB[au] is composed of **Manuel Abendroth**, **Jérôme Decock** and **Els Vermang**, based in Brussels, Belgium. In their practice, the artists investigate the relation between art and language not only by means of written words and other forms of coded language, semantics, but also through signs, or semiotics. Likewise, they take a linguistic approach, employing information and communication science in the field of art.

Many of **LAB[au]**'s works originate from definitions specific to the field of art, such as the monochrome. This leads them to question the limits of language, since the meaning of the monochrome, the fascination of the void, is not described in its definition but can be apprehended only through a wider understanding of art. In this way, they address the tradition of painting through terminology while contextualizing it in its cultural perspective.

However, any language can be encoded into secondary media where the use of colours, shapes, patterns, etc. forms a visual language. **LAB[au]** utilizes these different media while speaking of syntax, grammar and vocabulary. In doing so, they further research possible ways to translate, transcode different artistic expressions from one media into another.

LAB[au]'s practice is rooted in the tradition of conceptual art, where tautologies and fundamental units such as space and time constitute the artistic vocabulary. Through the use of algorithms the artists contextualize these notions in our contemporary world.

The exhibition title **yes:no, perhaps** is an expression in programming logic, a conditional statement stemming from language philosophy. Accordingly, propositional logic allows relating algorithmic and conceptual thinking through linguistics - which constitutes the focus of the exhibition.

Mario Mauroner Contemporary Art Vienna is delighted to present "**yes:no, perhaps**" here in Vienna as a follow up to the trio's successful solo-show "**if then else**", inaugurated at the Casino Luxembourg in Luxembourg in 2019.
